

EDUCATION

- **University of Oklahoma** Norman, OK
B.S. Information Science and Technology August 2020 – May 2025
 - Coursework: Database Design, Fundamentals of IT, Data Analytics, Information Retrieval, Mobile Application Development, Project Planning and Management
- **University of Electro-Communications (UEC)** Tokyo, Japan
Academic Exchange — JUSST Program; Independent Research at AWCC August 2023 – July 2024

EXPERIENCE

- **M1 Global** Pryor, OK
SOC Analyst — Hyperscale Cloud Infrastructure Facility April 2026 – Present
 - Operate on-site at one of the largest hyperscale data center campuses in the United States, developing direct exposure to the scale, operational tempo, and infrastructure footprint of a mission-critical computing environment
 - Monitor and triage alerts across large-scale systems, identifying issues and following structured escalation procedures with full documentation accuracy across every shift
- **Choctaw Casino and Resort** Durant, OK
Game Protection Operator — promoted from Surveillance Operator August 2025 – March 2026
 - Conducted hourly server room walkthroughs at a high-uptime gaming facility, performing visual inspections of equipment status and environmental conditions, and escalating any hardware errors observed through detailed incident reports
 - Promoted within months of hire based on demonstrated reliability, sound judgment, and consistent performance in a regulated, compliance-driven environment
- **Carl Albert Congressional Research Center** Norman, OK
Technical Assistant — University of Oklahoma January 2025 – May 2025
 - Digitized and managed archival collections across digital systems, applying file format standards and structured workflows to support reliable retrieval at scale
 - Resolved 100% of faculty and visiting scholar support requests, including system access, file format issues, and workflow troubleshooting in a professional academic environment

PROJECTS & HANDS-ON EXPERIENCE

- **Custom PC Builds & Hardware Troubleshooting — Independent:** Built 10+ custom desktop computers from individual components, including CPU/GPU installation, RAM and storage configuration, BIOS setup, and OS deployment. Hands-on experience diagnosing and resolving hardware-level issues
- **Small Business IT Support — Local Businesses (Pryor, OK):** Provided component-level repair, hardware troubleshooting, and system updates for local businesses including a dental clinic. Diagnosed failures, replaced faulty components, and restored systems to operational status under real customer deadlines
- **AI-Driven Traffic Signal Optimization — UEC / AWCC, Tokyo:** Designed and evaluated a Q-Learning RL controller in Python simulated in SUMO, achieving a 9.1–16.9% reduction in average vehicle delay versus baselines. Authored a conference-format research paper independently

SKILLS

- **Hardware & Infrastructure:** Component-level PC builds and repair, hardware diagnostics, server room monitoring, alarm management, environmental and equipment inspection
- **Systems & Networking:** Windows, Linux (foundational), BIOS configuration, OS installation and deployment, basic networking concepts, troubleshooting methodology
- **Programming & Data:** Python, SQL, R; SIEM tools, log analysis, structured incident reporting, data integrity validation
- **Other:** Microsoft 365, Google Workspace, Git · English (native), Japanese (intermediate)
